• Advantages

1. Quick Installation
2. Self-locking height adjustment
3. Convenient Maintenance
4. Chemical and UV resistance
5. Corrosion resistance
6. No False Alarm
7. Safe and non-toxic
8. Loud Alarm
9. Conspicuous Flashing Lights
10. No painting required
11. Customized Logo
12. Ultra-long battery life
13. Choice of Length

• Applications and typical environments

Height Alert Bar is designed to safeguard elevated assets from vehicle - induced damage. When impacted by a vehicle, it emits clear audible and visual alarms, alerting drivers to take measures and avoid collisions. Easy to install, it effectively protects critical facilities such as industrial doors, overhead conveyor lines, and elevated pipes.
